

KR-480

Product Description

KR-480 is a methyl and phenyl containing silicone resin product. It has excellent compatibility with organic resins and can be used to imbue them with the features of silicones. It is a safer, more eco-friendly alternative to conventional antimony, halogen, and phosphate based fire retardants.

Product Features

- Excellent compatibility with organic resins
- Flame retardant properties when used as an organic resin modifier
- White flake silicone resin

Typical Applications

- Fire resistant resin modification. Contact a Shin-Etsu representative for more information.

Typical Properties

Product type (taxonomy term)	Resins and Oligomers
Kind	Methyl/Phenyl Type Resin
Active %	100

Note: Values are not for specification purposes.
